

**13<sup>th</sup> Meeting of the INTOSAI Standing Committee on EDP Audit:  
Moscow, 22-23 April 2004**

**Report on the Committee's Web Site: Paper by SAI-UK**

1. This paper reports developments on the Committee's Internet Web Site (<http://www.intosaitaudit.org>) since the last meeting in Oslo in September 2003.
2. Over the past three years the number of web site visits has increased steadily from under 2,000 to over 10,000 per month, with the average length of a visit increasing from around 10 to around 30 minutes. Unfortunately we do not know what types of visitors we attract. An analysis by country suggests that the majority are from the USA, followed by the UK. The annex contains a summary of statistics for December 2003 and January 2004. (January is a traditionally low month for visitors to the site.)
3. With regards to web site development and maintenance, since September 2003 we have:
  - Added Edition 19 of intoIT;
  - Maintained facilities to allow users to register interests;
  - Maintained the index of Committee member's web sites;
  - Significantly expanded the list of reference material (see separate report).
4. We aim to update the web site approximately every two weeks. This involves cataloguing other quality IT-related performance audit material that comes to our attention, and adding additional information resources that we believe will be of interest or use to IT auditors working in the public sector. We also carry out a review of the validity of our pointers to material held on other web sites from time to time and remove any links that are no longer valid.
5. Projects 1, 3 and 7 of the Committee's programme on the Auditing e-government, which is the subject of a separate agenda item, will – if agreed - lead to further changes in the design and structure of the web site in due course.
6. The Committee is invited to note the improvements and additions to the web site, and to make suggestions for further improvements and the addition of new material.

**March 2004**
